BÖWE

Textile Cleaning

- > Wide range of products
- > Easy operation
- > Energy saving
- > Durability
- > Low maintenance

BÖWE, a German company with a long experience in the design and manufacture of industrial machinery for the cleaning of textiles, has ranked among the industry leaders by meeting the most rigorous European Directives on quality, safety and environment protection and an efficient customer service.

Present in over 50 countries providing solutions for cleaning processes in the most diverse sectors of activity.

- **Health**
(Hospitals, clinics, nursing homes, etc.)
- **Hospitality**
(Hotels, residences, spas, campgrounds, lodging, etc.)
- **Communities**
(Prisons, military barracks, schools, religious communities etc.)
- **Sports Centres**
(Clubs, gyms, spas, etc.)
- **Trade**
(Dry Cleaners, Laundry Self Service, aesthetic centers, hairdressers, etc.)
- **Vessels**
(Cruise, commercial or military vessels)
- **Industry**
(Food, livestock, electronics, cleaning, nuclear, textiles, etc.)

We handle all kind of Laundry projects, based on a rigorous analysis of the customer needs, project development, implementation, consulting and training in washing processes, all with the guarantee and the most efficient after-sales service support in the five continents.

LaundryLine

Efficiency, reliability, long-lasting and low maintenance.

BÖWE unveils its new range of products **LaundryLine**, with its washers, dryers, extractors, rolls and ironers, in response to the increasing demand in the process of cleaning in water.

An offer designed to effectively adapt to the needs of our customers with machines that make from efficiency, reliability, high capacity and low maintenance work its main competitive advantages.

Washer extractors

Several different models of washer extractors heating options, spin speed and programming to help you find the best solution to your cleaning processes.

Extractors

An ideal complement low speed washer extractors.

Dryers

Robust construction with a choice of different types of heating and several programming options.

Rolls and ironers

For processing all kinds of linen that will fulfill your premises and production model.

Washer extractors

- > Ergonomics and easy operation.
- > Energy saving.
- > Durability.
- > Low maintenance.
- > Robust stainless steel construction.
- > Electric, steam or hot water heating.
- > Built with multiple extraction speeds: High, medium and low.
- > Three different types of programmers.
- > Memory kit for external programming.

Washer extractors

A model of efficiency, security and quality

The new range of washer extractors **BÖWE LaundryLine** has been designed taking into account the selection of the appropriate materials and tests under the toughest work conditions.

Factors such as ergonomics, easy operation, energy saving, durability and low maintenance have been decisive in the development of this range. Its rugged stainless steel construction, the different heating options, electricity, steam or hot water, the different spin speeds and the programming possibilities help you find the best solution for each washing process for your establishment.

M Programmer

16 standard wash programs with 42 possible variations.

MC Programmer

It has the same features as the M model, but incorporates programmable coin operation, making it ideal for campings, self-service laundries, etc.

MP Programmer

16 standard wash programs and the possibility of creating 84 other programs, freely choosing all variables (temperature, bath levels, spinning speed of the drum, etc ...).

The new range **BÖWE LaundryLine** washer extractors comprises machines with capacities (10, 13, 18, 25, 40, 60, 120 kg), a large variety that will adequately meet your production needs.

- Frequency inverter improves work versatility and washing results.
- Various dosing signals depending on the different types of fabrics, according to process requirements.
- The possibility to incorporate optional double drain for water use, version for ships, etc. will provide specific solutions for your needs.
- Available in three speeds BWH spin-models with a G factor=350, BWM models with a G factor=200 and models BWL with G=87.

	BW10	BW13	BW18	BW25	BW40	BW60	BW120
Loading capacity							
Kg	10	13	18	25	40	60	120
Dimensions (mm)							
Width	692	788	884	980	1310	1430	1780
Depth	805	870	914	1040	1325	1425	1715
Height	1155	1300	1404	1565	1650	1800	2250

Tumble driers

A model of strength, reliability and efficiency

BÖWE has developed a wide range of driers that prepare garments for the final folding. Its rugged construction, the stainless steel reversing drum, the possibility of using different heating options, electricity, steam or gas and the multiple programming possibilities allow you to find the best solution for each drying process on your laundry.

Analog Control

Electromechanical programmer with drying cycle timer allows temperature selection and cool-down system.

Digital Programmer

Ten preset programs and one modifiable. Easy programming, indication of remaining time and real work temperature.

The new range of **BÖWE LaundryLine** driers is composed of machines with capacities (11, 17, 26, 38, 45, 60, 85, 125 kg), a variety that will allow you to fulfil your needs.

- Frequency inverter for smooth starting and braking and increasing the versatility and durability of the machine.
- Stainless steel drum built long-term, with reversing system.
- Moto-reducer prevents direct transmission belts and pulleys and reduces maintenance.
- All machines are equipped with a progressive cooling system, which prevents wrinkling.
- The large diameter loading door with an opening of 180°, makes the loading and unloading very quick and easy.
- Lint filter is very easy to clean.
- Wide range of options, such as residual humidity control, tilting system in models 85 and 125 kg, will let you customize your choice and meet your needs.

	SB11	SB17	SB26	SB38	SB45	SB60	SB85	SB125
Loading capacity

Dimensions (mm)								
Width	785	785	890	1118	1270	1270	1466	1800
Depth	830	1100	1335	1317	1070	1355	1695	2110
Height	1664	1664	1782	1780	2376	2376	2600	2780

Tumble driers

- > Robust construction.
- > Stainless Steel drum with reversing system.
- > Electric, steam or gas heating.
- > Analog or digital programmer.
- > Variable frequency inverter.
- > Progressive cooling (cool-down).

Rolls and ironers

Rolls and ironers

A model of work, safety and productivity

BÖWE completes its LaundryLine range of equipment for textile cleaning with a wide offer of rolls and ironers for processing all type of linens (sheets, pillowcases, tablecloths, napkins, etc.). The series consists of machines with a great work capacity and the ability to adapt to your premises and heating options (electric, steam or gas).

- Programmable microprocessor control to adjust speed and temperatures. Ironing speeds with adjustable inverter for a perfect ironing quality.
- Loading and unloading from the front thus saving personnel and space costs.
- Modern fault diagnosis system that avoids service.
- Security guard for hands and automatic cooling stop avoids unnecessary risks to personnel.
- Wide range of optional accessories (built in folder, etc.) that will allow you to enrich the services to your customers and adapt to their needs.

	ROLLS			IRONERS		
	35/140	35/160	35/200	50/190	50/250	50/320

- > Electric, gas or steam heated.
- > Programmable microprocessor to control temperature and spinning speed.
- > Frequency inverter drive
- > Loading and unloading from the front.

Hydroextractors

The ideal complement

BÖWE also offers hydroextractors to reduce residual humidity on clothes washed in a low speed washer extractor. Formed by robust and reliable machines, with cover and floating stainless steel drum, automatic braking, 15 minutes timer cycles and interlock opening hatch, which will save time and costs in the drying process.

Laundryline Applications

Effective solutions for your business

Wet Cleaning System

The new system of water gentle wash designed by the R+D Research and Development team of BÖWE, has been developed based on a detailed study on the care of textiles in different washing and drying and processes.

An effective alternative to traditional methods of dry cleaning, using new processes, biodegradable soaps, special conditioners of the fabrics and the versatility that the MP programming system offers. PSM, to help you achieve an excellent result and cleaning assurance of care and cleaning of a wide range of fabrics and garments.

The BÖWE Textile Cleaning products complement the LaundryLine range with high performance equipment and high performance in finishing and ironing garments.

Ironing board

Our tables have a large ironing surface, built in high capacity boiler and performance and the possibility of working in both directions.

The high quality and finish of materials, optimum Ironing area illumination and excellent location make this team Ironing tables the most versatile and reliable on the market.

Jackets dummy

The dummy Jet Iron has a sophisticated locking system of the garment, thanks to which the number of ironing operations is reduced, allowing high productivity and an excellent finish.

Offering great ease of use that includes various standard programs ready for use and versatility that gives you the ability to run Ironing all maneuvers with a single pedal.

Laundry

At BÖWE we specialize in developing self-service laundry projects, one of the segments of industrial laundry with greater growth today.

Our machines are designed to work 365 days a year thanks to its robustness, reliability, ease of operation and the possibility of incorporating automatic dispensers. Models are available with two speeds BWH spin -models with a G factor = 350 and BWM models with a G factor = 200- all with excellent qualities that allow you to adjust the investment possibilities and optimize the profitability of your business.

BÖWE machines feature integrated kits in the programmer for coin or pre-paid card. They can also connect to central payment through the new developed version of MC with which customers may pay the price of different washing programs selected or use one of the four special fast self-service programs.

1 Ironing table
2 Jackets dummy
3 Self-service laundry
